

## **The Reason Why I am Here**

I started my university education in 2012, as a Chemical Engineering student in ITU.

In the first year, I realized that Chemical Engineering is not suitable for me. I have been interested in science since my childhood, but I realized that I'm in the wrong place.

I transferred from Chemical Engineering to Computer Engineering in the beginning of the second year of my university education. I choose this profession because I think I can perform it with passion, and also I think I am suitable for the work style of the computer engineers. I am in the third year now, and I am sure that this is the right choice for me.
